

ZETAPHAR  
— BIOLABORATORIES —

## OUR MISSION

The accurate consultancy service allows, with discretion and confidentiality, to follow the customer in the design of a completely customised line of products using innovative raw materials in step with the demands of the ever-changing market.

Thanks to the presence of an in-house research and development laboratory, the company not only has its own formulations but is also open to innovation and the development of specific formulations, on request, which allow it to be always attentive and sensitive to the different needs of the individual customer.

Our laboratory and research and development department are constantly engaged in the development of increasingly innovative customised formulas.

## PRODUCTION

- Creation of complete lines of skin care products, toiletries and make-up.

- Creation of cosmetic lines using BIO products with ICEA and COSMOS and BIOCERT certification

- External collaborations for specific microbiological tests on request (for example the CHALLENGE TEST) and for analysis (on request) that allow to enhance the claims of the finished product (for example the WATERPROOF RESISTANCE TEST)

- Internal quality control

- Internal Regulatory Department for 360 ° document assistance

- Personalized packaging studio

- Supply of the full service product: research and purchase of packaging, creation of the graphics and -production and filling of the semi-finished product.

- Supply and filling of the product in containers (bottles, jars, tanks, tubes, airless ...) chosen and/or provided by the client.

- Supply of bulk products in IBC (Intermediate Bulk Containers) and/or in barrels of different capacities, from 50 Kg to 1000 Kg, with the possibility to proceed with the autonomous packaging of the product.

# COLLECTION
